EDUCATION

Western Governors University | *Online* Expected December 2027

Bachelor of Science in Cloud and Network Engineering, Microsoft Azure

Relevant coursework: Network Analytics and Troubleshooting • Azure Solutions Architecture (AZ-305) • AI Enhanced Network Architecture

CERTIFICATIONS

Microsoft Azure: Solutions Architect Expert (AZ-305) • Administrator Associate (AZ-104) • Fundamentals (AZ-900)
AWS: Solutions Architect Associate • Certified Cloud Practitioner
CompTIA and other: Security+ • Network+ • A+ • Cloud+ • ITIL 4 Foundation • LPI Linux Essentials

TECHNICAL SKILLS

- **Operating Systems:** Windows 11, Windows Server 2025, Linux (Ubuntu)
- **Microsoft:** Active Directory, Group Policy, NTFS permissions, SMB shares, PowerShell
- **Networking:** TCP/IP, DNS, static routing (VyOS), firewall rules (OPNsense), Wireshark, GNS3
- **Cloud and Automation:** Microsoft Azure, AWS, Terraform, GitHub Actions, Hyper-V
- **Tools:** Git, GitLab, GitHub, EHR systems

EXPERIENCE

Direct Support Professional Sep 2025 to Present

Aurora Home Care Inc., Northbrook, IL

- Schedule client medical appointments and log medication administration three times daily in an electronic health record system
- Troubleshoot residents' devices and keep the company's network and printers running
- Write daily progress notes and incident reports that meet state documentation standards

Direct Support Professional | *Glenkirk, Northbrook, IL* Jun 2023 to Aug 2025

- Coached individuals with developmental disabilities on job skills and kept accurate notes, medication records, and incident reports

PROJECTS

Network Troubleshooting Simulation (WGU D412) | *GNS3* Nov 2026

- Resolved all six simulated network and security help desk tickets with a 100% score, using Wireshark, VyOS routers, an OPNsense firewall, and Windows Server DNS
- Asked each requester targeted questions and confirmed every fix before closing the ticket

Windows Server 2025 Home Lab | *Independent Project, Hyper-V* Sep 2026

- Built a domain controller and Windows 11 client with an SMB share, NTFS access for an AD security group, and Group Policy drive maps, verified with PowerShell

Azure Resource Hierarchy and Terraform Governance Lab | *Independent Project, GitHub* Aug 2026

- Built resource groups, allowed-location and required-tag policies, and GitHub Actions validation with Terraform and PowerShell

Secure Azure Ubuntu Web Server with Azure Bastion | *Scarstack Solutions Bootcamp* Jul 2026

- Deployed an Nginx VM behind Azure Bastion with a subnet NSG, and documented the fix for SSH left open to the internet

Version Control and Git Workflow Lab | *WGU Coursework, GitLab*

- Ran a branching workflow, resolved a merge conflict, and tagged release V.1.0.0
